

Anybody Can Play PIANO Dot Game

DOTS for games

Here are exact replicas of the dots on the Anybody Can Play PIANO app so you can play the game of sticking these dots on a keyboard that matches the keyboard on the computer/tablet screen.

(If you don't want to cut out bunches of dots, just use stickers. Just be sure that they are the same color as the dots on the computer keyboard.)

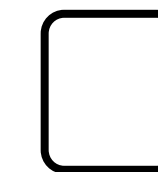

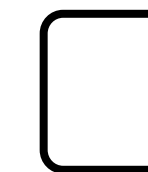

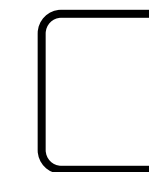

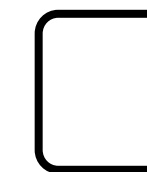

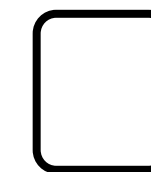

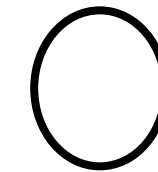

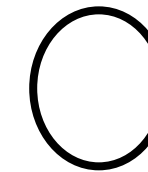

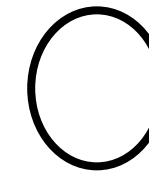

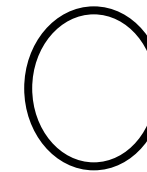

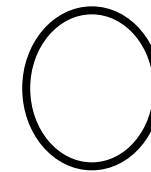

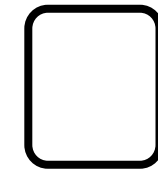

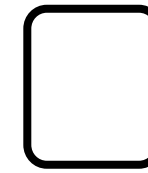

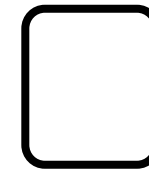

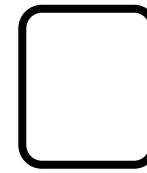

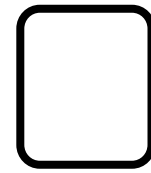

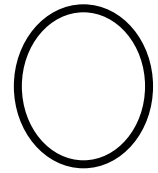

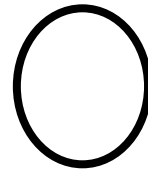

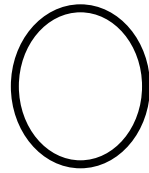

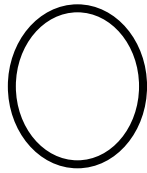

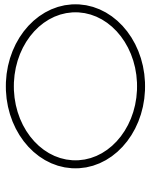

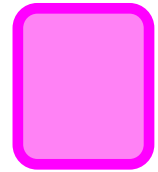

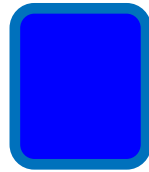

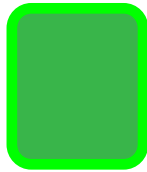

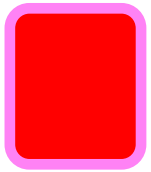

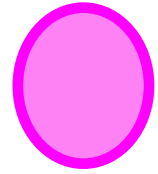

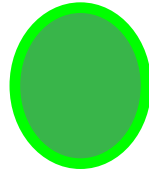

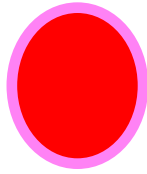

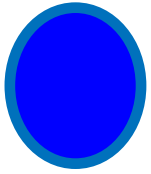

Cut the dots out and tape or glue to a removable label for sticking to the piano/keyboard keys (or tape directly to keys). By using a removable label it is easy to re-use the dots. Be sure to bend a small part of the label over so you have a tab for easy removal.

GAMES WITH DOTS

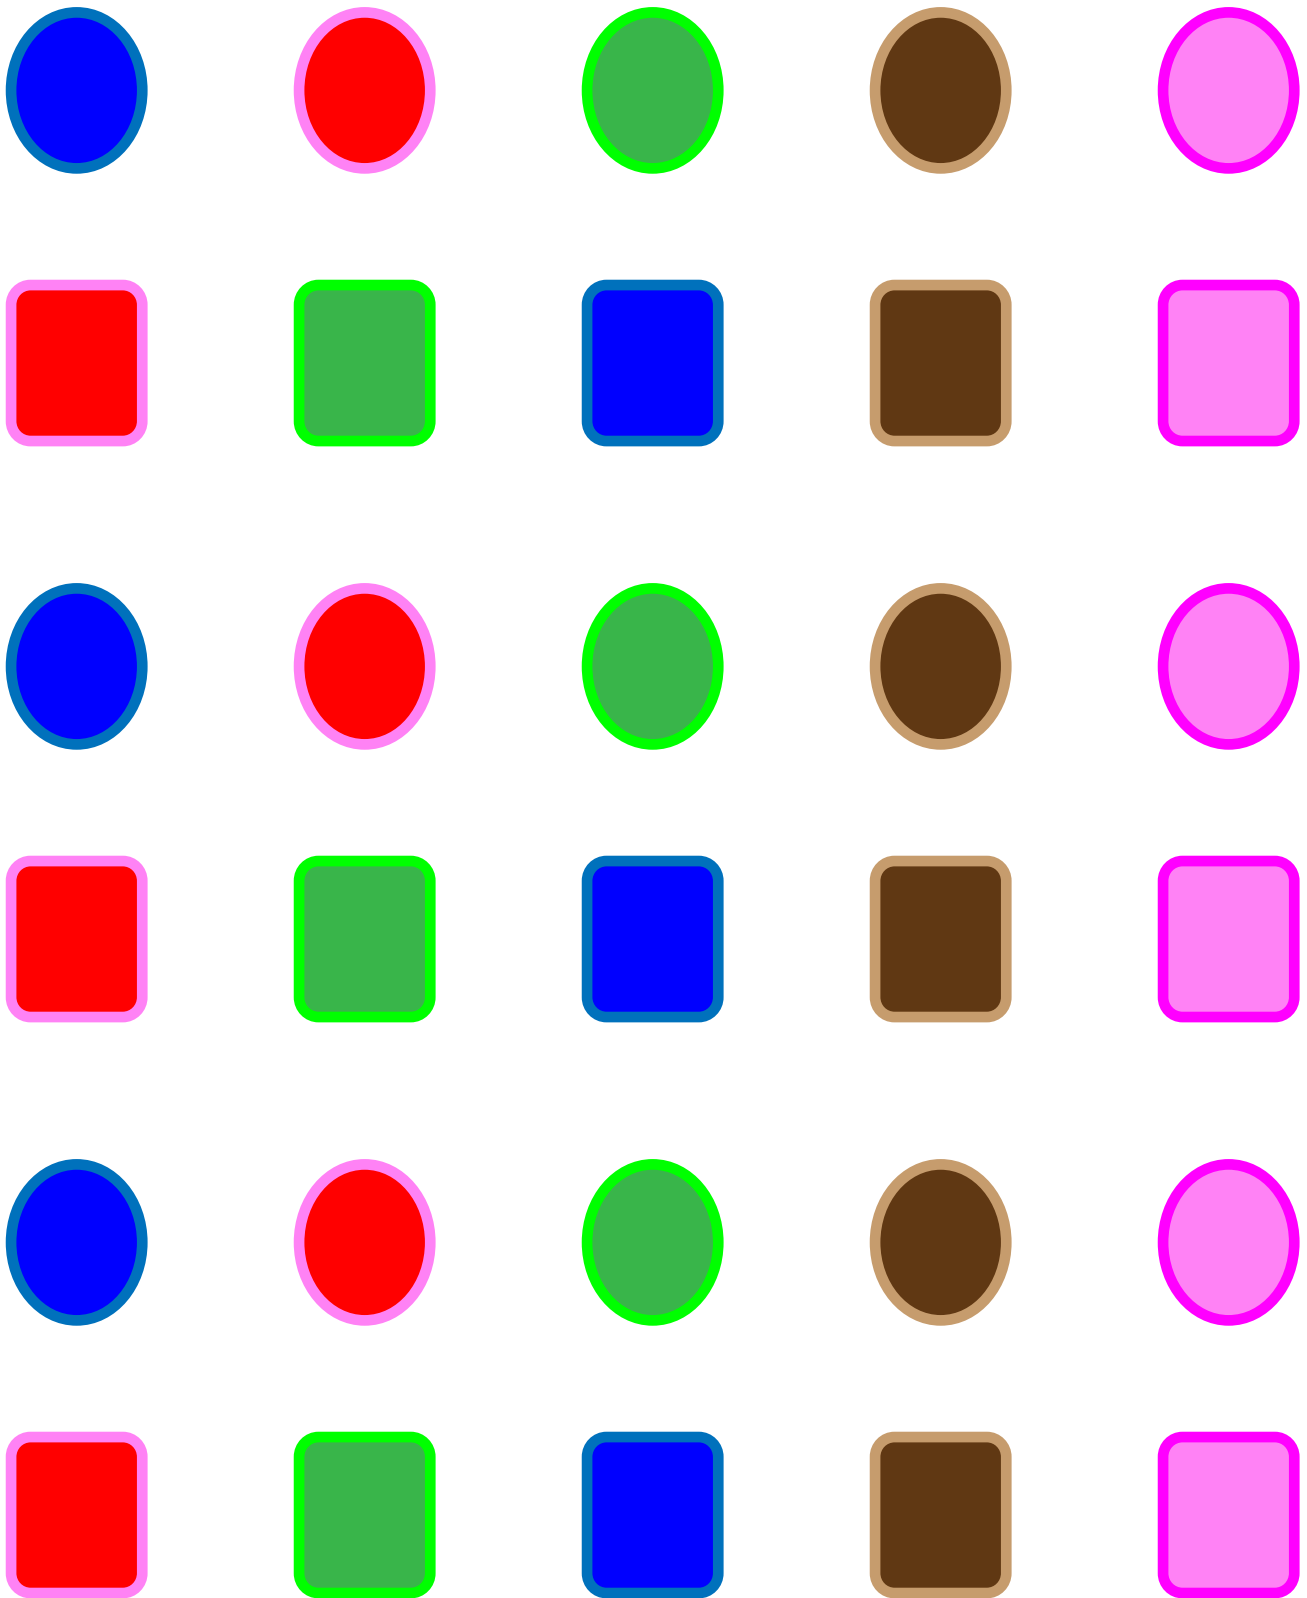

1. Place dots on paper keyboard to match exact positions of dots on computer/tablet screen for a particular song. Comment about the pattern of white keys and black keys so children learn how to find the correct placement for each dot.
2. When using a keyboard connected to the app, place the dots on the keyboard, then as the children progress, have them choose a dot to remove to help train their ability to remember which keys to play. Continue this process as children improve until no dots are necessary on the keyboard!! WOW! Remind them that they can play on ANY piano when they no longer need the dots!

A PAGE OF DOTS!

Colored dots for the "Stick the Dots on the Keys" game - and for the "I Can Do It By Myself" crowd, dots that need to be colored first, then stuck on the keys.
