INSTRUCTIONS

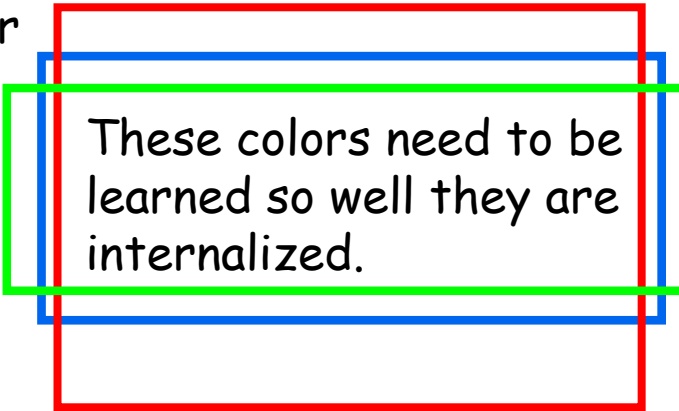

Laminate the sheets with the color coded pointer hands (for multiple use).

Show students the hands and have them color code the sheet with the uncoded fingers. Let them use finger numbers or dots - whichever is more appropriate. And, either use the sheet with one set of pointer hands, or use the small sized hands.

ACTIVITY

Name a color, have students tap that colored finger. ie. Tap your right hand red finger 3 times.

If you use the finger numbers, say both the number and color. ie. Tap right hand red finger 2...or tap left hand red finger 4.

These colors need to be learned so well they are internalized.
