

## **Level 2**

### **After School Coordinator**

Level 2 activities are closely linked to the first level. They simply increase the skill levels.

Just check to make sure everyone understands the activities and has the proper materials for the students.

Also make sure the students have spent daily time with the Anybody Can Play PIANO app.

Ask to see some of their finished activity sheets from time to time and ask questions about them. Have the students show you and explain what they do with sheets such as the keyboard that they color coded. Sometimes students tell their teacher that they understand a concept when they really don't! If they cannot explain what they are doing to you, they need more time on that particular skill.

If you think a particular age level is having difficulty - especially the younger ones, suggest that the teacher use the "Step By Step" program for awhile.

Warn the students.....The Music Trail Game will have more complicated rhythms as time goes on.....

And.....I am sure you are aware of this.....be very complimentary both to students and teachers - especially if you are about to suggest doing something a bit different!
