

My Dot Sheet

Step 3

Anybody Can Play

This is a game for solidifying Right Hand finger colors.

I would recommend laminating these Dot Sheets for multiple usage.

Give each child a sheet.

Call out a color and have them choose a dot which is that color and touch the dot with their properly colored coded right hand finger.

Check after each color...tell children to "check" the person next to them to see which dot that person chose.

At first go slowly, but as the children become better at this, start going faster...and faster...and faster.

Compliment the children on their speed!

Step 3
