

## FLOWERS WITH STEMS

Trim around flowers, leaving some white around them

Laminate....

Cut around previous trim about a quarter to half inch away.

I just made two flowers because I had the room.

You don't have to use two flowers with the children - just pick your favorite color:)

What did I say about the quarter note?

That long line is called a stem.

And what did I say would help you remember that word "stem"?

Yes.....flowers sit on top of stems (Run fingers along the stem of the flower.)

Our music would sure look pretty if we had flowers attached to those stems rather than noteheads....
