

## KEY GROUPS TO CIRCLE: take home sheet

Talk about patterns to the children. Do they know what a pattern is? Where are some patterns?

Cover up the black keys on the paper you are using with another sheet of paper so they see only the white keys.

Comment about we could not find our way around the piano if all the keys were just white.

Move your paper so the white keys are covered.

Show them the black key pattern - 2, 3 2,3

You may want to go to the keyboard at this point and have them use two fingers for touching the 2 black key patterns and a fist for touching the 3 black key patterns.

Going back to the paper, have them point to a 2 black key pattern, then circle it. Find another 2 black key pattern and circle it.

Do the same for the 3 black key patterns.
