CREDIT CARD QUARTER NOTES

These quarter notes are sized to fit into a credit card laminating pouch.

Cut apart

(Dotted lines are for those using a paper cutter.)

Cut around definitions and glue lightly to back side of quarter note cards.

Laminate.

These little credit card flash cards are for the students are to take home. The first time they get a flashcard, insert in a tiny plastic box so they have a place for not only this flashcard, but those in the future as well. If they lose the box, they pay for a replacement!
