

Tap Those Dots!

Tap Those Red, Green and Brown Dots!

This is just like the pink and blue dot sheet, only using the dots for the song Rain Rain Go Away.

With this sheet, have the children hold their hands in the star position, but try to drop down the correct finger when touching the dot. Do tell them to notice that when they drop down their brown finger, the green finger comes down a little bit too. That is the way our hands work. Those two fingers work together a little bit.

That brown finger is the most difficult to use. Let the children know that so they work harder with that finger in order to show you they can do it!

Again, right hand only....and which hand is your right hand???

If you use only in class, I recommend you laminate this sheet. If you use it as a take home sheet, it doesn't have to be laminated, but make sure the children can explain to their parents what this sheet it all about! Pretend you are the parent and have each child explain this sheet to you. "Working on muscle memory!!"
