

Color these fingers  
the proper colors.

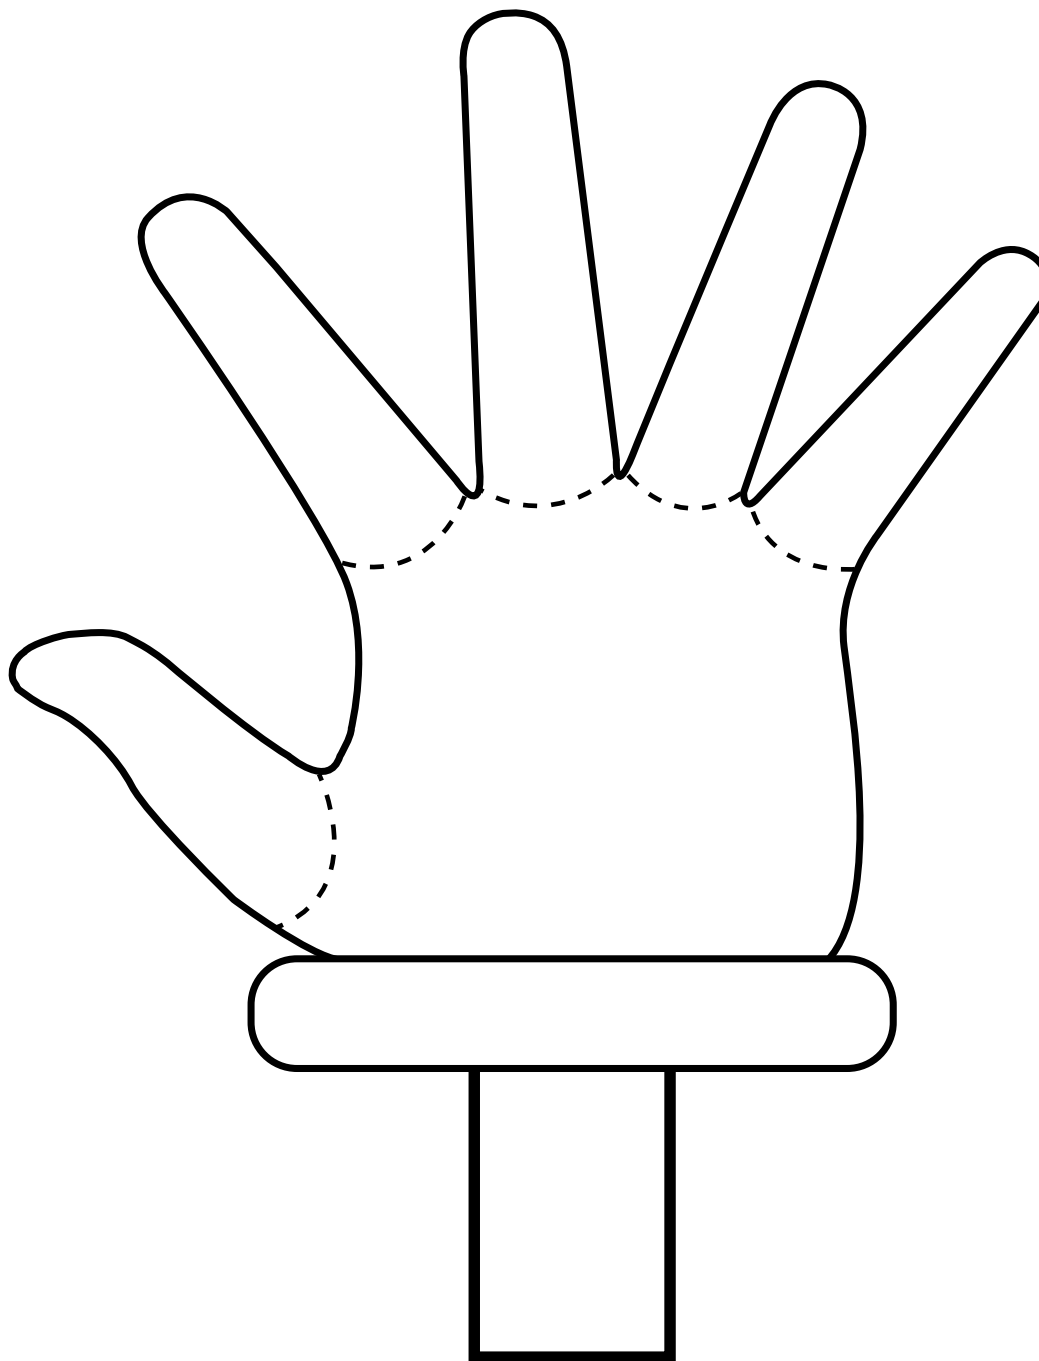

pink

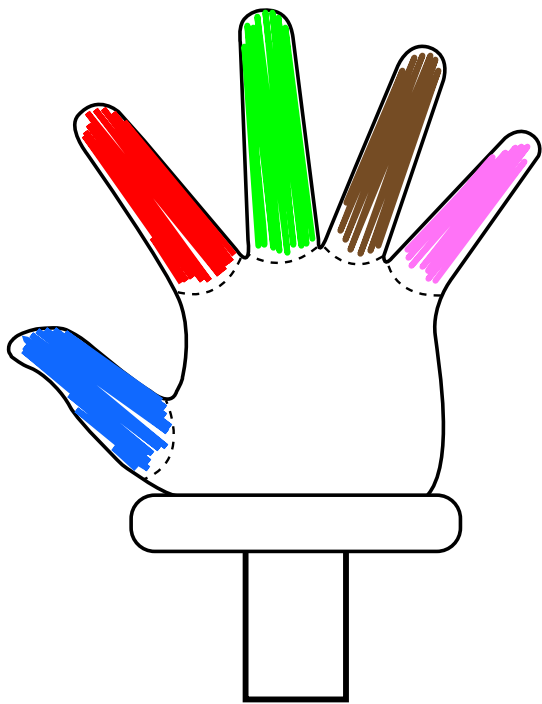

brown

green

red

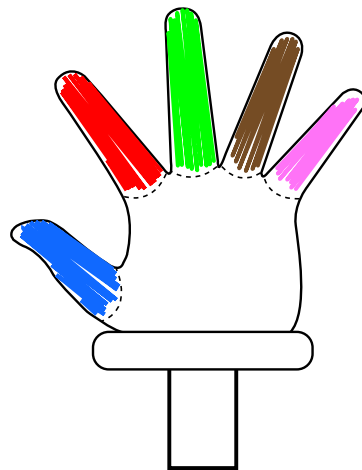

blue

## FINGER COLORS

Particularly for very young students, color code the right hand pointer hand. Some really young children do not color well so stickers work better than colors or markers. Or...have the child point to a finger and tell the teaching person which color it should be colored and "teacher" does the coloring.

## COLOR CODED HANDS

These hands can be cut out so students can look at them while doing their DOT SHEET or coloring the pointer hand if needed. If you want a substantial model hand, laminate.
