God gave us time when He gave us our first day and night.

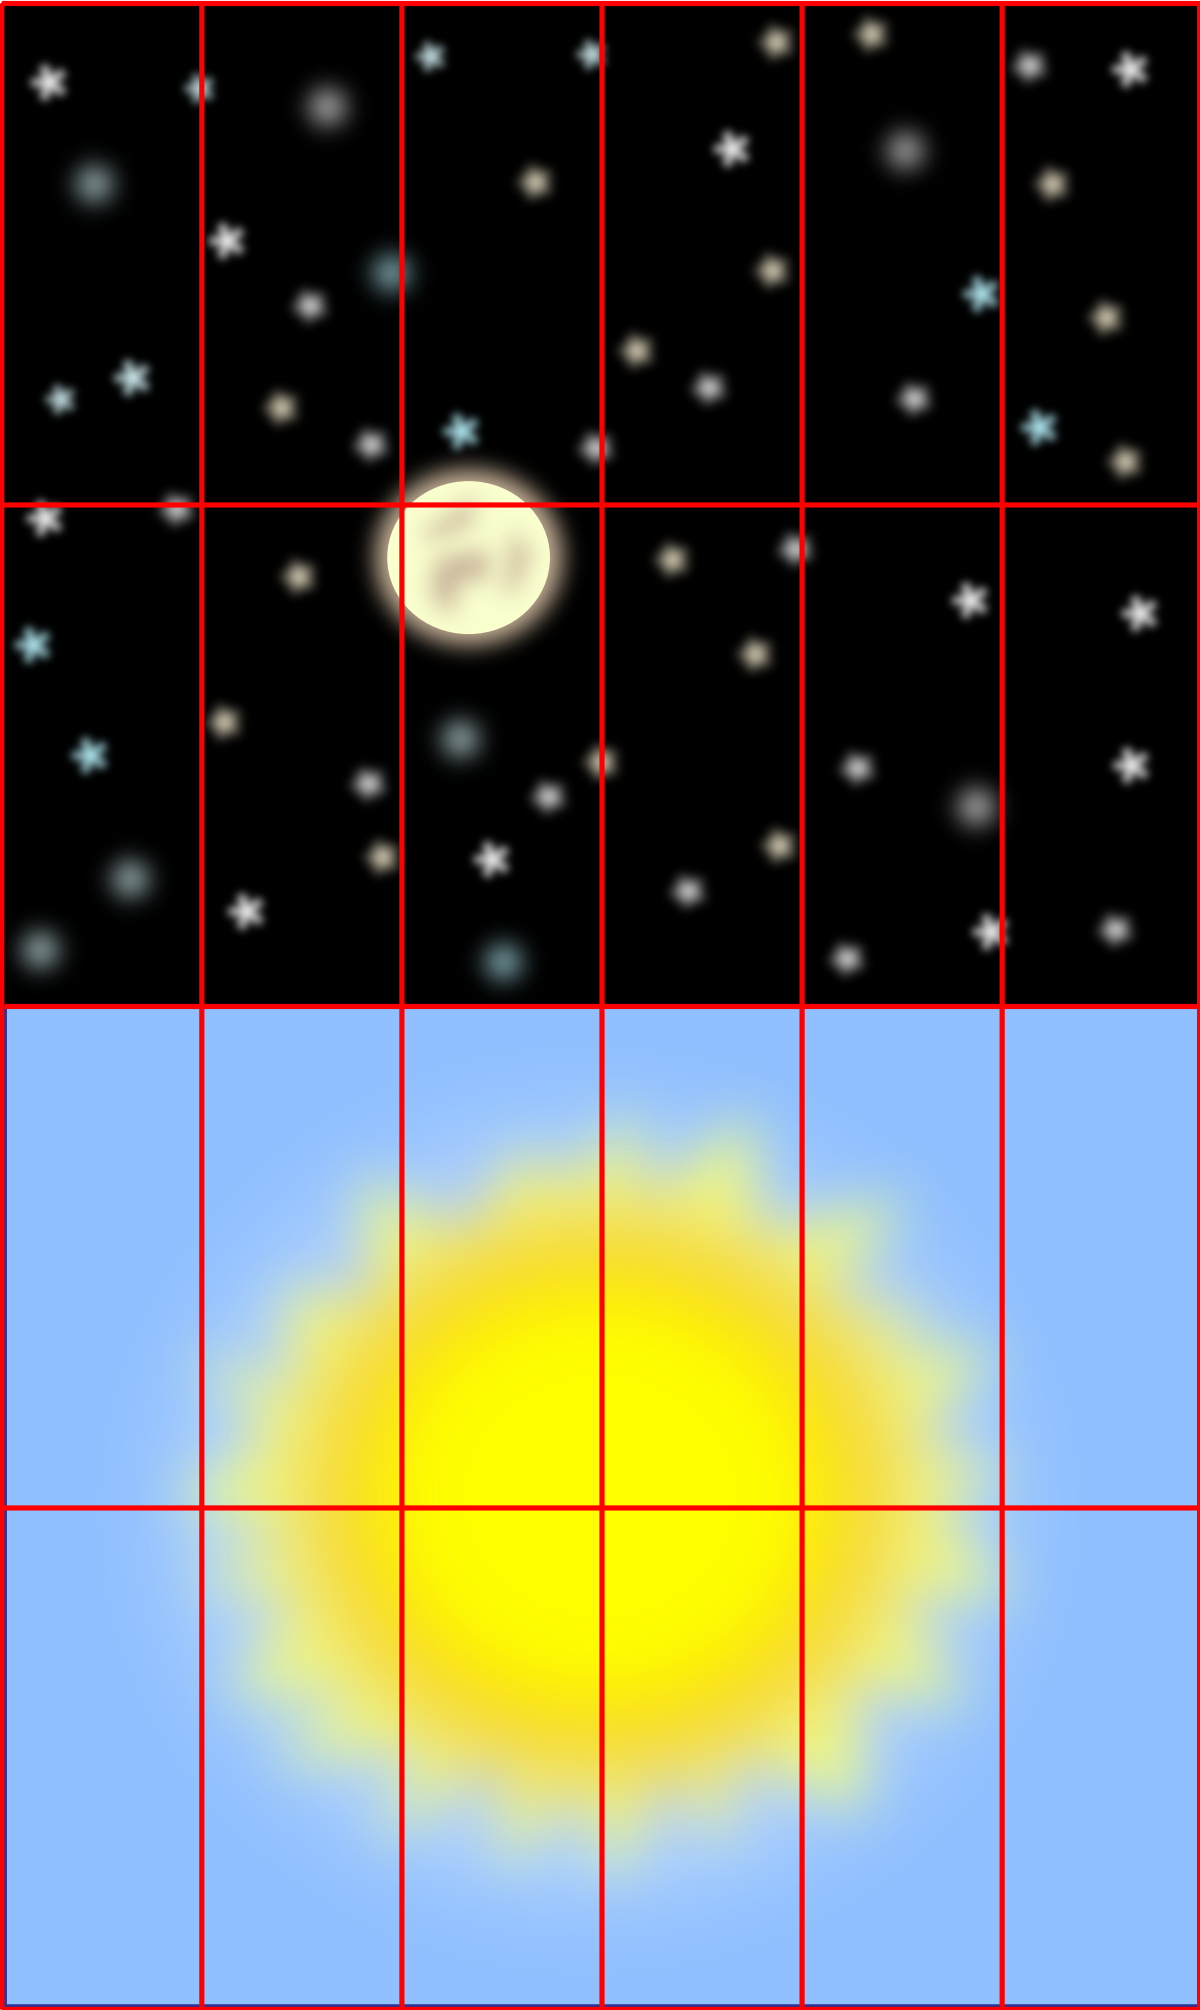

The sun gives us light during the day.

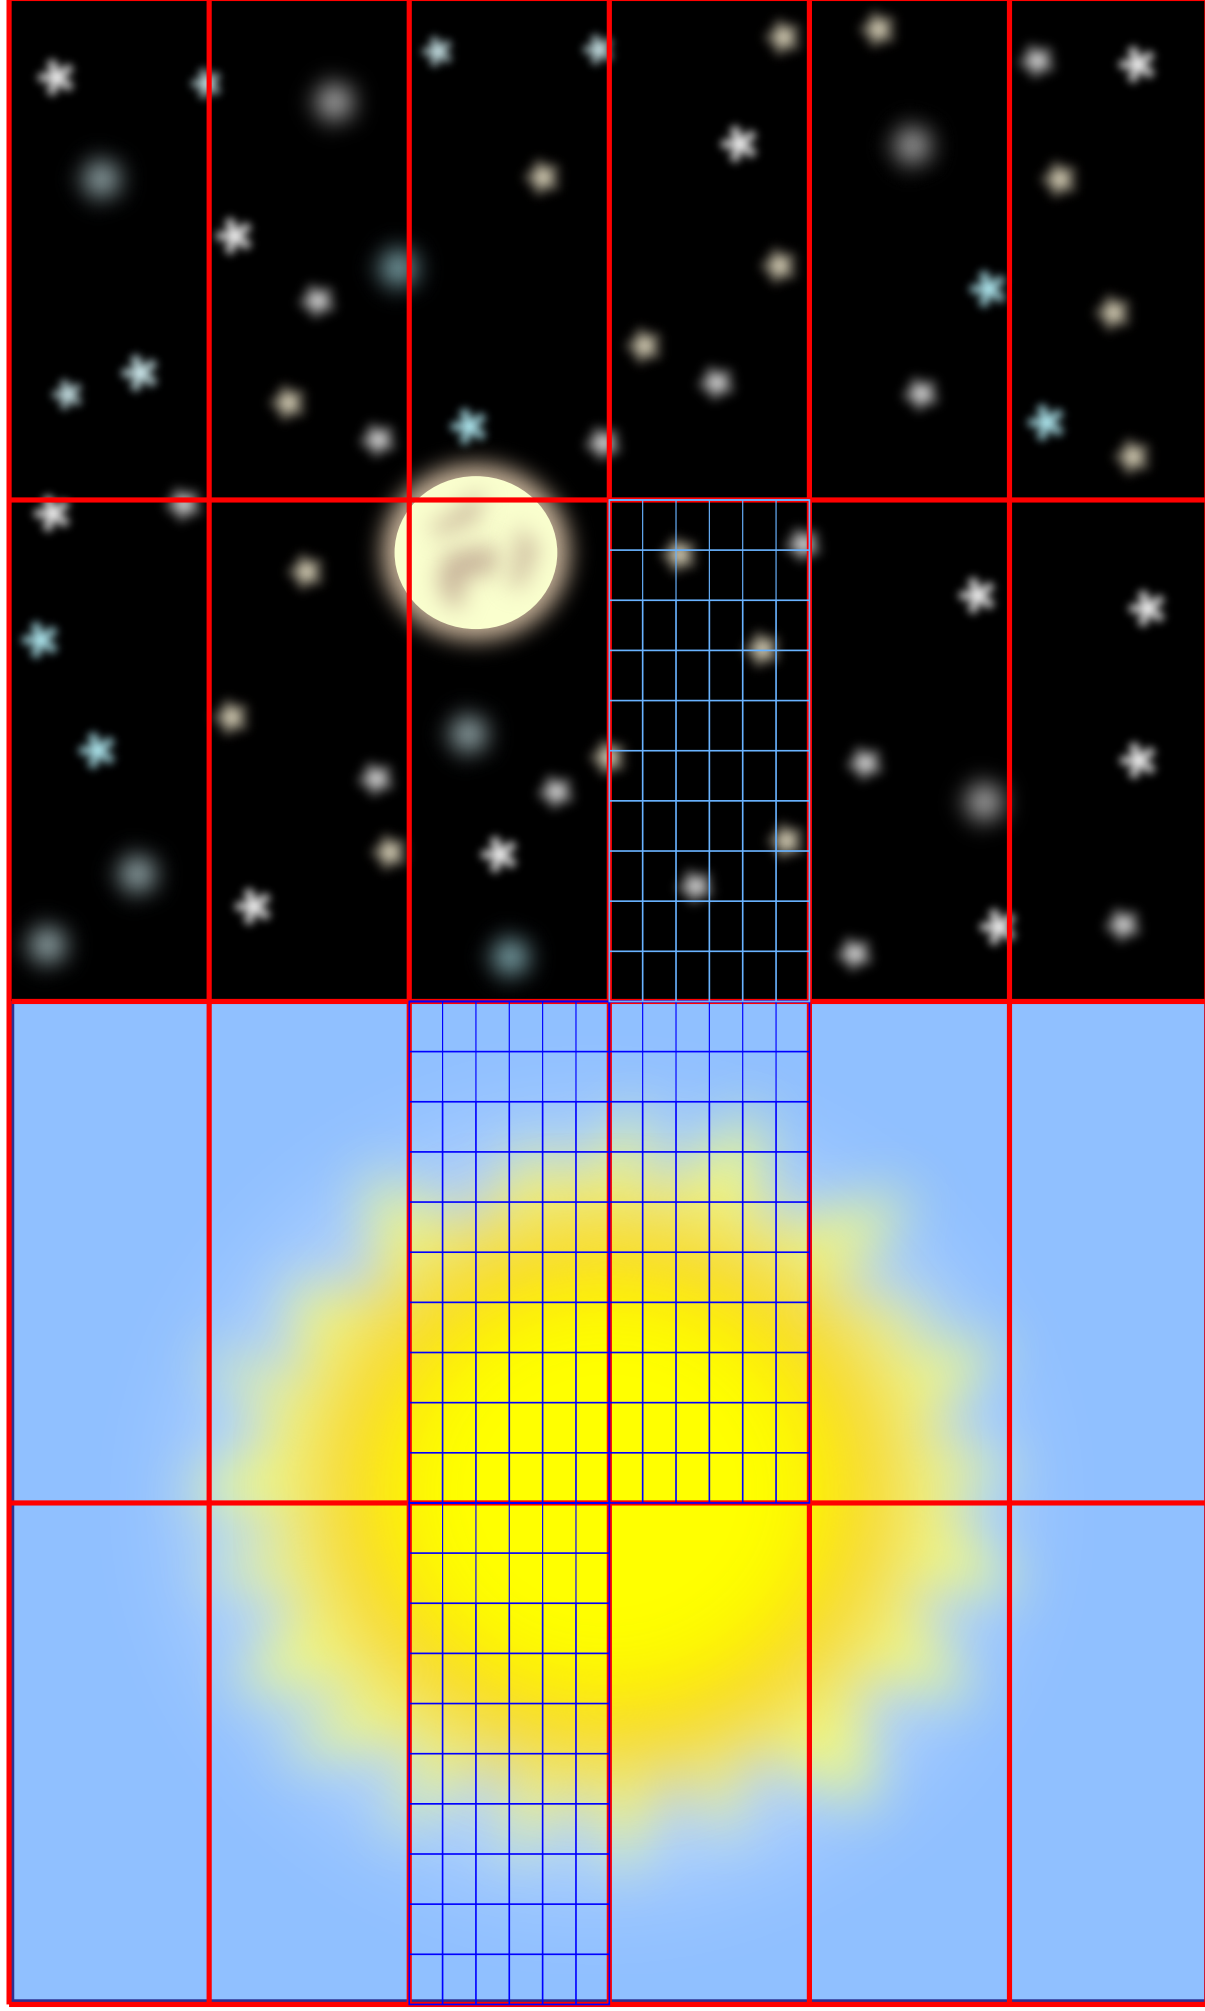

The moon and stars give us light during the night.

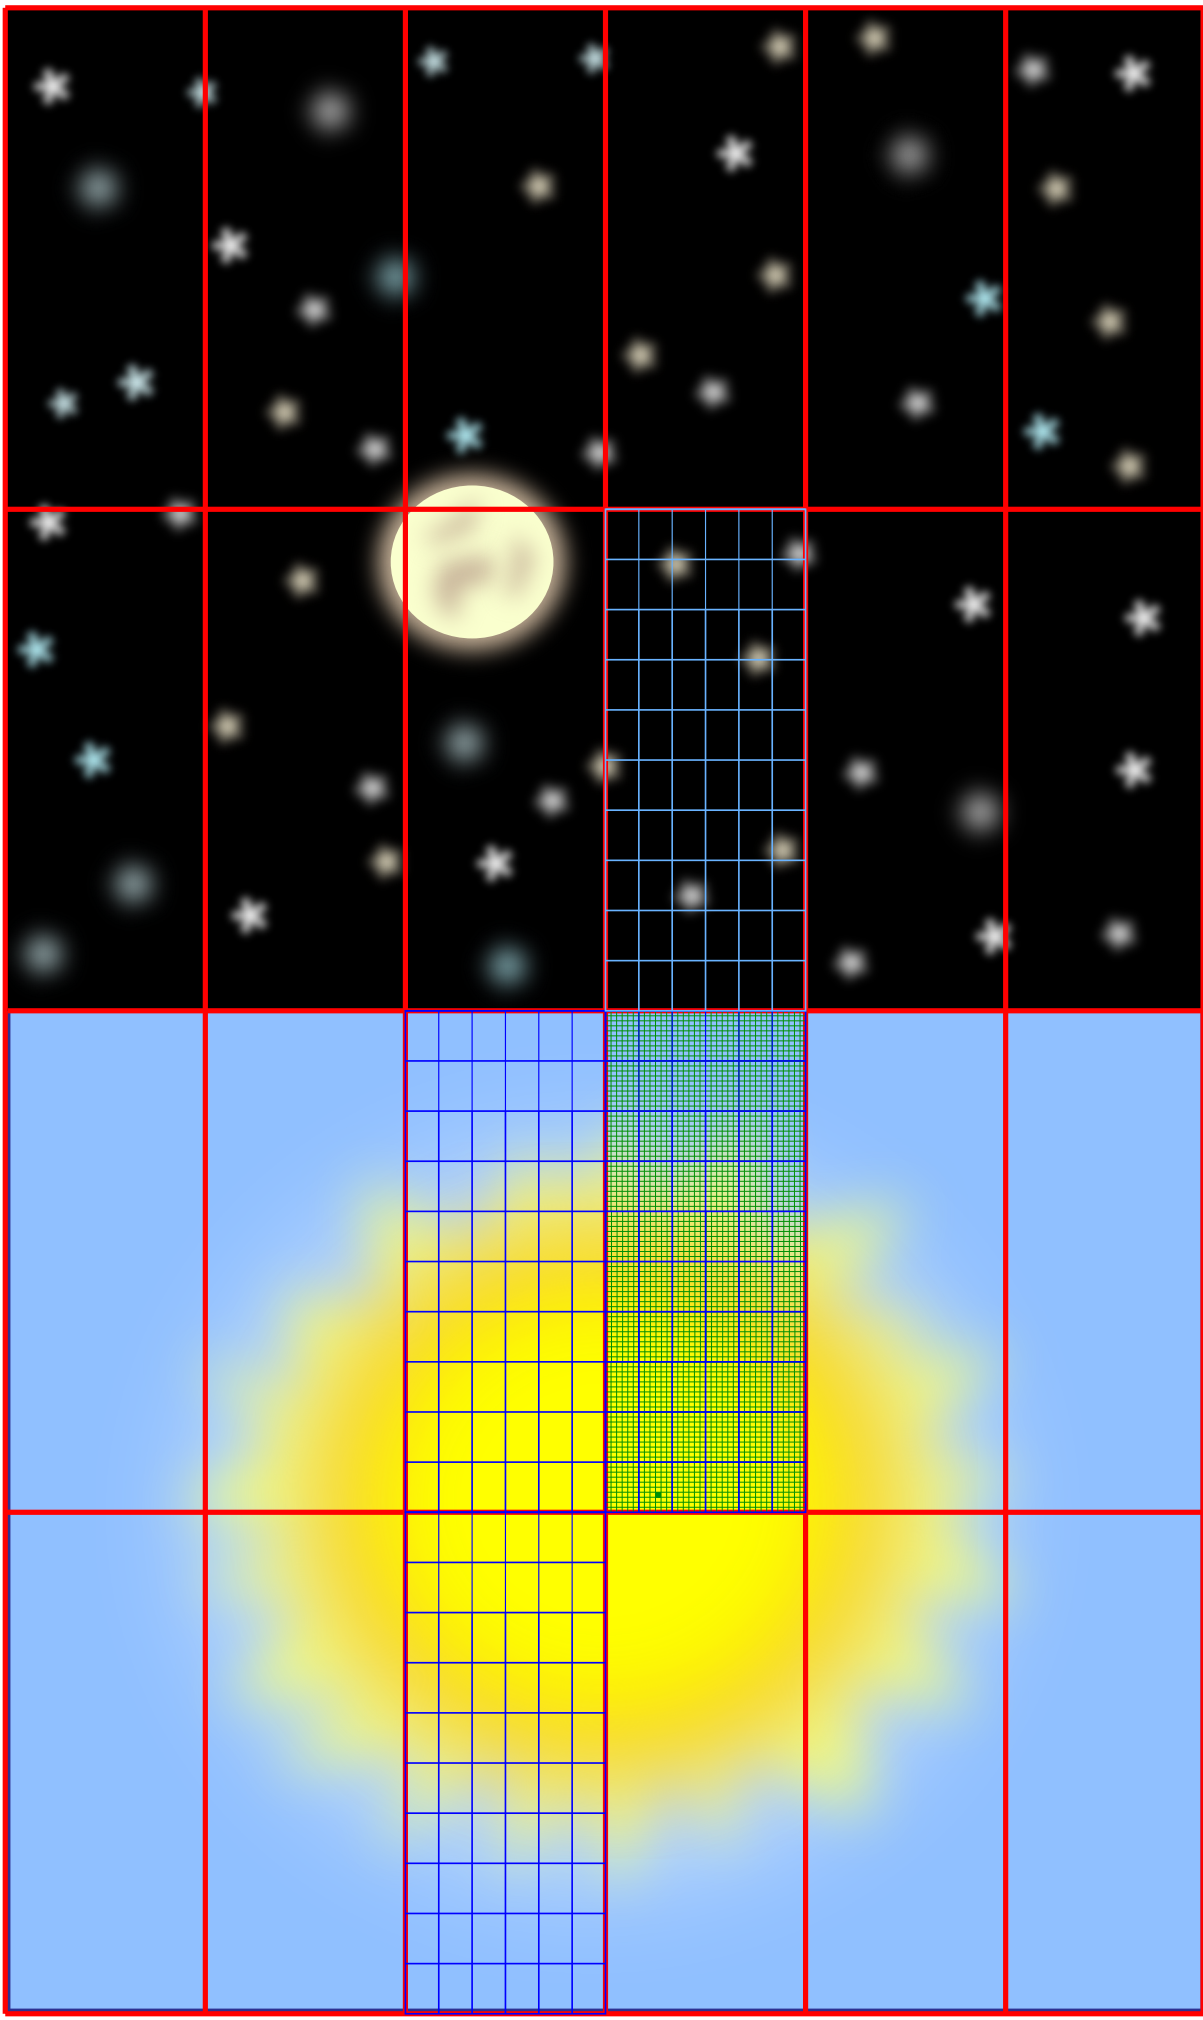

We divided our day and night into 24 pieces of time. We call these "hours".

Then we divided each of our hours into 60 tiny pieces that we call minutes.

And then...we divided our minutes into teeny tiny spaces of time called seconds.

That little teeny tiny filled in green square is one second.
